Bagian 2 Menulis Data ke File CSV (Ada file csv baru):

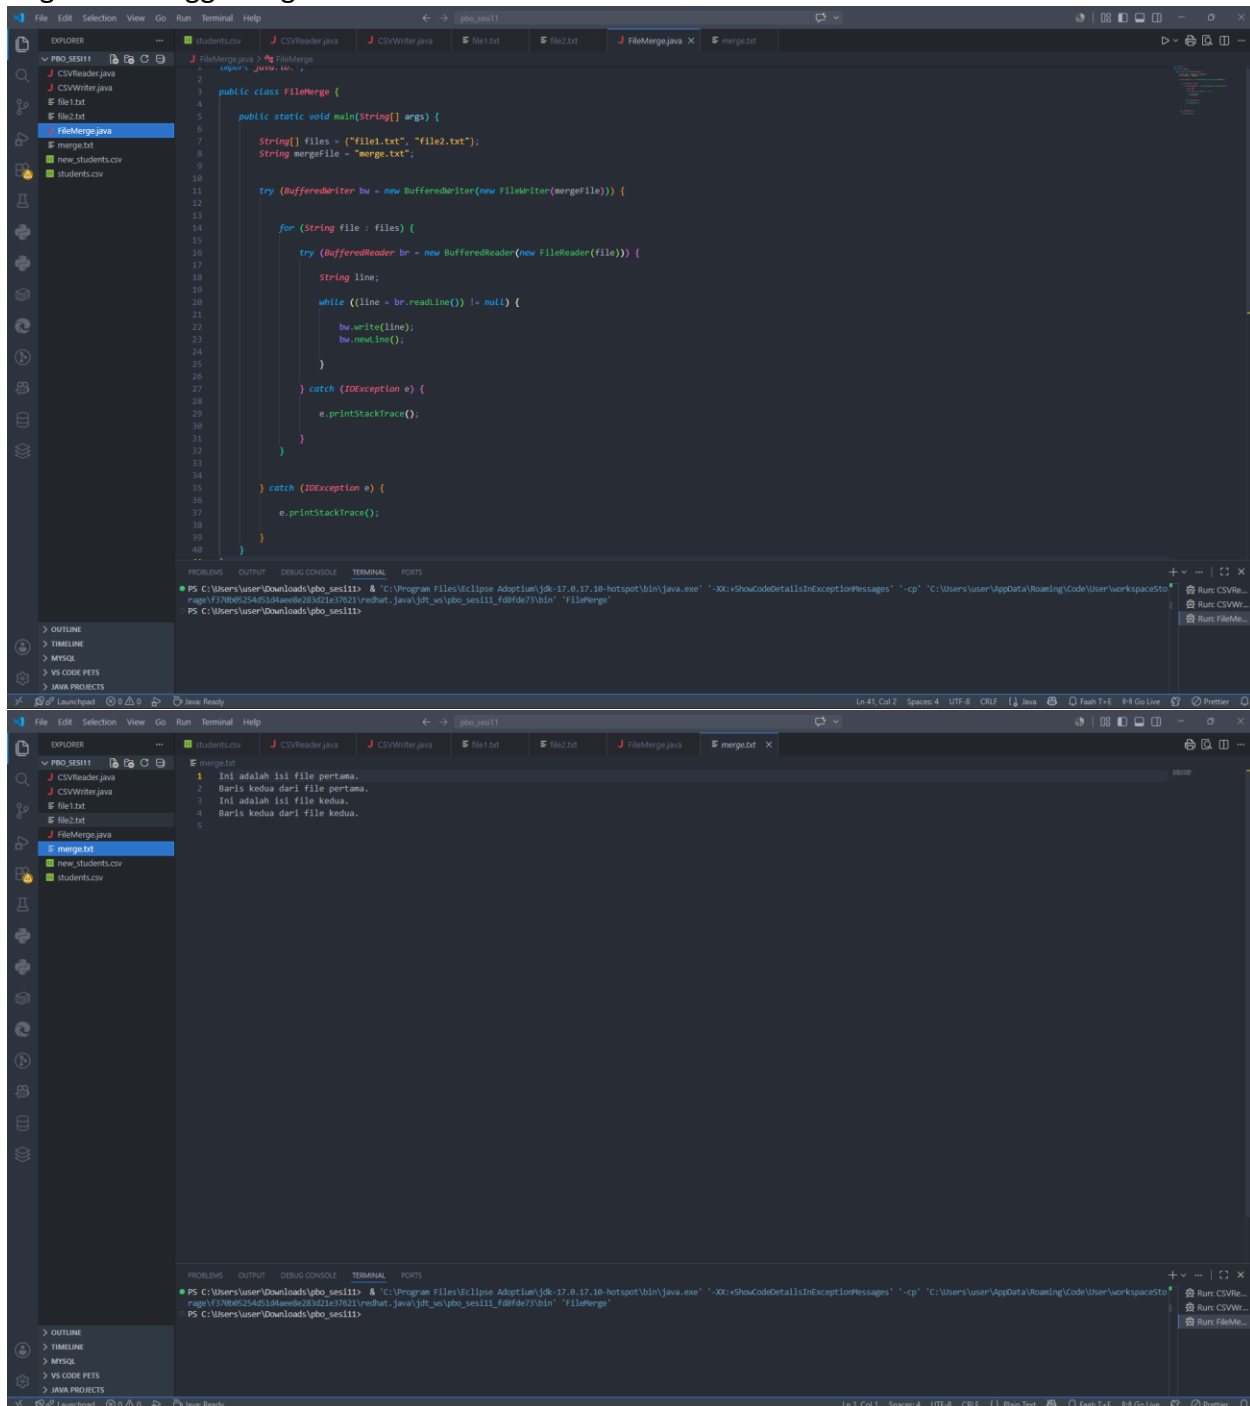

```
1 public class CSVWriter {
2
3     public static void main(String[] args) {
4
5         String csvFile = "new_students.csv";
6
7         String[] data = {
8             "4,david,21",
9             "5,cia,22",
10            "6,ferdy,21"
11        };
12
13        try (BufferedWriter bw = new BufferedWriter(new FileWriter(csvFile))) {
14
15            for (String line : data) {
16
17                bw.write(line);
18                bw.newLine();
19            }
20
21        } catch (IOException e) {
22
23            e.printStackTrace();
24        }
25    }
26 }
```

PS C:\Users\User\Downloads\pbo_sesi11>
```

Bagian 3 Menggabungkan dua file teks:

Program ini digunakan untuk menggabungkan beberapa file teks menjadi satu file baru. Program membaca isi `file1.txt` dan `file2.txt` menggunakan `BufferedReader`, kemudian menulis hasil pembacaan ke `merge.txt` menggunakan `BufferedWriter`. Proses pembacaan dilakukan baris demi baris hingga seluruh isi file berhasil digabungkan.

TUGAS A MODIFIKASI

```
1  import java.io.BufferedReader;
2  import java.io.FileReader;
3  import java.io.IOException;
4
5
6  public class CSVReaderJumlah {
7
8      public static void main(String[] args) {
9
10         String csvFile = "student.csv";
11         String line;
12         int jumlahBaris = 0;
13
14         try (BufferedReader br = new BufferedReader(new FileReader(csvFile))) {
15
16             while ((line = br.readLine()) != null) {
17
18                 jumlahBaris++;
19             }
20
21             System.out.println("Jumlah data dalam file: " + (jumlahBaris - 1));
22
23         } catch (IOException e) {
24             e.printStackTrace();
25         }
26     }
27 }
28
29
30
31
32
33
34
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL RUNS

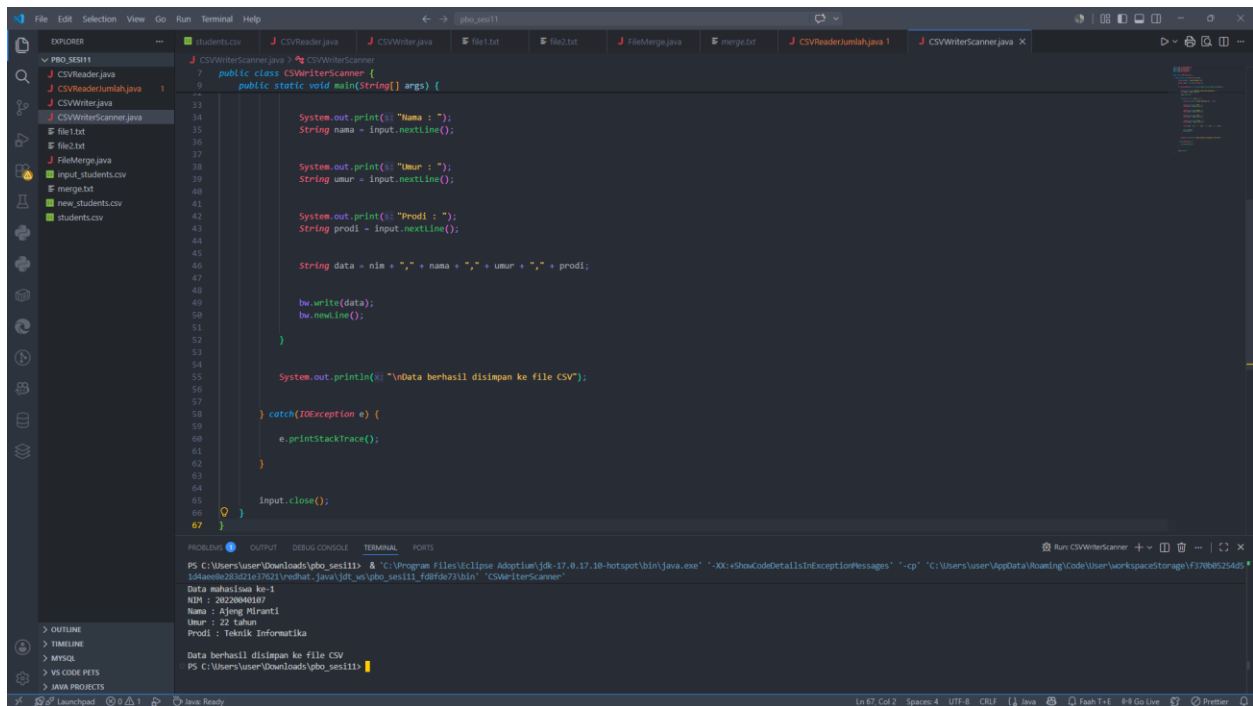

PS C:\Users\User\Downloads\gbo_sesi11> .\CSVReaderJumlah.exe -XX:-ShowCodeDetailsInExceptionMessages -cp "C:\Users\User\AppData\Roaming\Code\User\workspacestorage\17090525461d44e6b03a302a33a217e6eb\java\jdt_ws\gbo_sesi11_48f9ae73\bin" CSVReaderJumlah

Jumlah data dalam file: 4

PS C:\Users\User\Downloads\gbo_sesi11>

Program ini merupakan modifikasi dari CSVReader untuk menghitung jumlah data yang terdapat dalam file CSV. Program membaca setiap baris menggunakan BufferedReader, kemudian variabel jumlahBaris bertambah setiap kali menemukan baris baru. Header CSV tidak dihitung sebagai data sehingga jumlah dikurangi satu.

TUGAS B

Data berhasil disimpan ke file CSV
PS C:\Users\User\Downloads\pbo_ses111>

Program ini merupakan modifikasi dari CSVWriter dengan menambahkan class Scanner untuk menerima input dari pengguna. Data mahasiswa yang dimasukkan kemudian digabungkan dalam format CSV menggunakan tanda koma sebagai pemisah dan ditulis ke file menggunakan

BufferedWriter. Method write() digunakan untuk menulis data, sedangkan newLine() membuat baris baru untuk setiap data.

TUGAS C

The screenshot shows the Eclipse IDE with the following details:

- Explorer:** A project named 'PROJES11' is visible, containing files like CSVCopy.java, CSVReader.java, CSVWriter.java, FileMerge.java, and CSVWriterScanner.java.
- Editor:** The file 'CSVCopy.java' is open, showing the following code:

```
import java.io.IOException;

public class CSVCopy {

    public static void main(String[] args) {

        String sumberFile = "students.csv";
        String tujuanFile = "students_copy.csv";

        try {
            BufferedReader br = new BufferedReader(new FileReader(sumberFile));
            BufferedWriter bw = new BufferedWriter(new FileWriter(tujuanFile));
        }

        String line;

        while ((line = br.readLine()) != null) {

            bw.write(line);
            bw.newLine();

        }

        System.out.println(s: "File berhasil disalin");

    } catch (IOException e) {

        e.printStackTrace();

    }

}
```
- Terminal:** The output shows the command executed and the result: 'File berhasil disalin'.

The screenshot shows the Eclipse IDE with the following details:

- Explorer:** The project 'PROJES11' is visible, and the file 'students_copy.csv' is highlighted in the Explorer.
- Editor:** The file 'students_copy.csv' is open, showing the following data:

```
NIM,NAMA,UMUR,PRODI
01,Adi,22,IT
02,Budi,22,IT
03,Cici,21,TE
04,Dodi,22,TE
```
- Terminal:** The output shows the command executed and the result: 'File berhasil disalin'.

Program ini digunakan untuk menyalin isi sebuah file CSV ke file CSV baru. Program membaca file sumber menggunakan `BufferedReader` secara baris per baris, kemudian menulis setiap baris ke file tujuan menggunakan `BufferedWriter`. Dengan cara ini, seluruh isi file dapat dipindahkan tanpa mengubah format data.
